University Doctoral Students Union of Eötvös Loránd University

Faculty of Informatics Doctoral Students Union Representative candidates 2026

Attila Pelsőczi Domokos

As a representative, I would like to represent the interests of doctoral students.

Farah Mimouni

I believe students should not only be part of the university, but also have an active voice in shaping their academic environment. I would like to represent their needs and ideas, strengthen communication between students and the university, and contribute to a more supportive, connected, and inclusive doctoral community.

Zahira El Mahdaouy

Navigating the unique journey of a PhD has motivated me to step forward and ensure both local and international researchers have a transparent, proactive voice. My goal is to build a genuinely connected community by bridging communication gaps, smoothing out administrative hurdles, and creating spaces for interdisciplinary workshops and networking. I want to make sure none of us navigate doctoral life in isolation, and that every candidate feels supported, well-resourced, and heard.
