2. ACTIVITIES

In January, I personally attended the Faculty Management Meetings and the Faculty Council meeting. I contacted Dean Andra Düll. I initiated a personal meeting and consultation with her, together with the faculty student council representatives, which she welcomed. We will contact her in February to arrange a date. I also had the opportunity to personally contact the president of the Student Union and the chair of the Supervisory Committee, whom I invited to the next Student Union meeting (January 16, 2026) so that she could meet all the Doctoral Student Council representatives, as she also represents the Student Union in the EDÖK Supervisory Committee. She gladly accepted the invitation. In addition, József Orbán, the PPK FDSZ representative, contacted me and initiated an informal conversation with the DÖK.

At the DÖK meeting, we informed the representatives about the events at the EDÖK General Assembly, the election of the EDÖK president, and the tasks that were discussed. With the support of the EDÖK delegate assembly, we delegated our faculty's DÖK representative, Makszim Edina Beáta, to the University Equal Opportunities Committee.

On January 27 I took part in an online information session organized for doctoral students affected by the MAB investigation.

The main topics of the faculty leadership meeting on January 27 were the preparation for the MAB examination and the submission and voting on the draft dean's directive on supplementary rules for the use of artificial intelligence in education at the Faculty of Education and Psychology.

On January 27 we got in touch with representatives of FDSZ and got to know each other. They presented their activities specifically related to doctoral students, and we exchanged views on certain issues affecting doctoral students.

Others:

In consultation with the NDI secretariat, the corrected Hungarian and English updates to the DÖK page were posted on the website.

I actively exercised my right to vote in the PPDT and NDI DIT postal votes.

At the end of the month, I shared with the PPK DÖK representatives the evaluation of the questionnaire compiled for students participating in doctoral training during the past academic year. The task for the coming month is to process the content and formulate specific tasks.

Based on the responses received, we would like to make communication and information flow with students more efficient, as well as take stock of community-building needs and suggestions.

Representatives of the Student Council personally participated in three complex examinations as minute-takers.

On February 3, I participated in two panel discussions of the MAB accreditation review.

At the PPK DÖK meeting on February 3, I resigned from my position as president because, for objective reasons related to my research, I will be on passive study status in the next semester.

Edina Beáta Makszim took over the presidential duties as of today.

Please feel free to contact me with any questions or comments you may have. Thank you for reading my report.
